

CHALLENGE #6: IMPLEMENTATION OF HEAD TAGS

This the simple output of my implemented head tags, nothing crazy because in HTML heads aren't really visible to the human eye, unlike when you mess around with the body.

Figure 1: The Output

Trying out head tags!

In this part you can see the actions behind the scenes, in this particular screenshot, you can see the code or should I say; the insides.

Figure 2: The Code

```
index.html X styles.css
index.html > head > link
1 <!DOCTYPE html>
2 <head>
3   <title>Implementation of head tags</title>
4   <link rel="stylesheet" href="styles.css">
5   <meta charset="UTF-8">
6   <meta name="author" content="Christian James J. Perez">
7   <meta name="viewport" content="width=device-width, initial-scale=1.0">
8 </head>
9 <body>
10  <p class="laman">Trying out head tags!</p>
11 </body>
```

```
index.html styles.css X
styles.css > .laman
1 .laman {
2   font-family: sans-serif;
3   font-size: 5rem;
4   text-align: center;
5 }
```
