

CHALLENGE #9: VIDEO AND FORMS

This challenge was a little bit fun because I can mess around with different kind of videos that I want. Like this funny meme video that I embed.

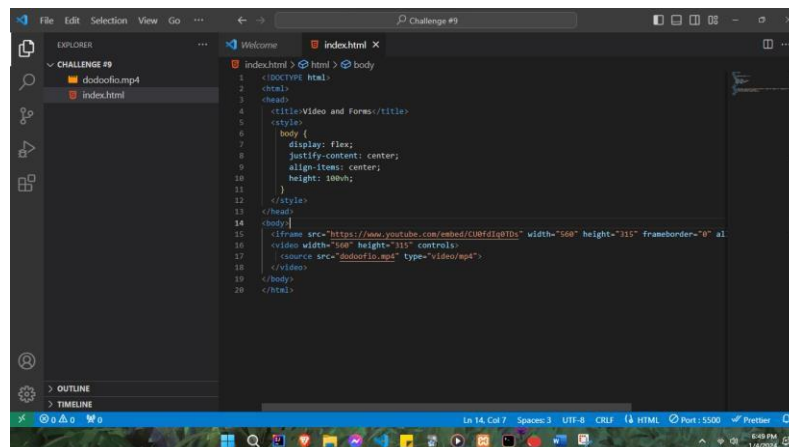

In this figure, the left side is powered by Iframe, the link is from YouTube. The right side is locally saved from my drive and is powered by video element.

Figure 1: The output

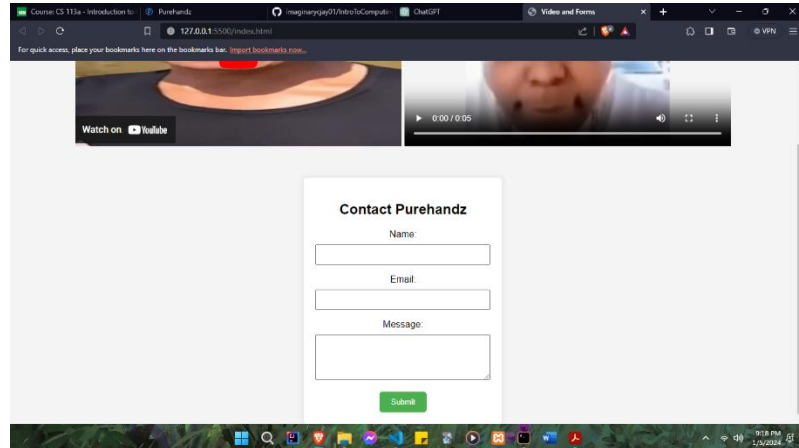

In this figure, you can see the code and the difference of Iframe and video element

Figure 2:

In figure 3, you can see the contact form

Figure 3:

The code of the contact form in figure 4
