## CHALLENGE #4: IMPLEMENTATION OF FAVICONS

In figure 1, you can see the I successfully implemented a favicon to my project Figure 1:

```
File Edit Selection View Go ...  

| Plate | File |
```

Figure 1.2: A close look

```
<meta name="description" content="Purehandz Water Refilling and Printing Service
<meta name="author" content="Christian James J. Perez">

<title>Purehandz</title>
        link rel="icon" type="image/x-icon" href="images/purehands-icon.ico">

<!-- mga css files -->
        link rel="preconnect" href="https://fonts.googleapis.com">
```

Figure 2: The result
